

## Temos Conference Program published

Temos Conference Program published

Current developments in medical travel as well as the recommendations and suggestions from the Advisory Board and the participants of last year's Conference were the basis for this year's Temos Conference Program. By combining scientific and experienced based presentations with practically oriented workshops we hope to also meet your expectation for an interesting Conference program and topics to be discussed. Please have a look at the program. Here you can register to ensure your discounted registration fee. Please take into account that the Early Bird offer ends on 31 July.

Updated information about the Temos Conference is published on [www.temos-conference.com](http://www.temos-conference.com).

We look forward to seeing you in Cologne!
