Dear Dr. Mika,

Large assistance companies like MD Medicus use the Temos information system to find certified and quality checked hospitals, clinics and other medical services providers worldwide.

In principle, Temos certified hospitals are being preferred to non-certified facilities because quality and treatment costs are transparent.

Furthermore, Temos certified medical facilities receive direct access to MD Medicus to negotiate individual contracts also to the advantage of patients and costs bearers. Thus, hospitals, clinics and other medical service providers have the opportunity to increase the number of patients allocated to them.

MD Medicus looks forward to further cooperating with Temos.

Yours sincerely,

Frank Ratzaff
President MD Medicus Holding GmbH
